RedSky Receives Three Year JITC Extension Supporting Avaya

RedSky E911 Manager® certified with Avaya JITC approved products for three more years as an E911 Management System

CHICAGO -- RedSky Technologies, Inc., the leading provider of E911 and NG911 solutions, announced today that is has completed its Certification testing at the United States Air Force Telecommunication Systems Security Assessment Program (TSSAP) lab in San Antonio, TX, where RedSky's E911 Manager® was re-certified with Avaya Communication Manager® 6.x (ACM) and the Avaya 87xx through September of 2018.   RedSky tested against Avaya ACM v6.2 and the interoperability certification covers all Avaya ACM versions that are currently on the Approved Product List (APL).

"We are pleased to support the security requirements of the Department of Defense by providing precise location information to emergency responders when a 9-1-1 call is made on or off Base," said Jerry Eisner, ENP, Group Director - Public Safety at RedSky Technologies, Inc. "E911 Manager® is integrated to Avaya to seamlessly track IP phones in real time and provide instant 9-1-1 call notifications to security personnel."

E911 Manager® is the only E911 Management System that is on the DISA Approved Products List for use on Department of Defense networks. A link to RedSky Technologies on the JITC Approved Products List is here.
