Keri Software Now Windows 8 Compatible

Keri Systems, a leading provider of integrated card access control, has released a version of its acclaimed Doors.NET software that is Windows™ 8 compatible, making it one of the first in the industry to do so. Any version of Doors.NET at revision 3.5.1.17 or higher is compatible with Windows 8 operating systems.

Doors.NET is Keri's primary access control software application, designed to manage the company's NXT TCP/IP-based hardware platform as well as their PXL-500 hardware platform, hardware from Mercury Security, Assa Abloy Aperio and IP-enabled locks, and Schlage AD Series Wireless Locks. Doors.NET allows multiple operators to manage and monitor an unlimited number of sites concurrently, providing integrated video, alarm reporting and prioritization, and optional photo badging. NXT, Keri's newest access control platform with built-in Ethernet compatibility, provides unmatched system flexibility, ease of use and cost effectiveness.

About Keri Systems
Keri Systems is a leading provider of integrated card access control, with integrated telephone entry, video badging systems, biometrics and digital video recording. Located in the heart of California's famed Silicon Valley with offices in Europe, the Middle East, Australia and Latin America, the company continues to enhance its leadership in security hardware and software technology by offering a suite of products and services for customers requiring everything from basic functionality to customizable solutions for high end installations.
